

AUTOGAUGE V1

LEVEL MEASUREMENT SYSTEM

ON DUTY FOR THE CHIEF ENGINEER

MCS marine control services

AUTOGAUGE V1

FH 9 % E%%& HJE&F

AUTOGAUGE V1 is the next generation of electropneumatic systems for level, density and draught measurements, featuring improved modular design, enhanced capabilities and reduced cost.

- Modular, cost-effective
- Combining proven methods with latest technology
- Ideal for retrofit of all existing pneumatic systems
- Smart scanning version
- Stand-alone or seamless integration in Evolution IAS
- Adaptive pulse operation- minimum air consumption
- Redundant serial interface ModBus RTU
- Automatic calibration of sensors
- Automatic monitoring of leaks
- Automatic purging of air tubes for protection from contamination
